PROFESSIONAL SUMMARY

Backend-focused **Java Developer / Software Engineer** with **3.5+ years of experience** designing, developing, and deploying scalable microservices and RESTful APIs using **Java 11, Java 8, Spring Boot, PostgreSQL, and AWS**. Proven track record in building high-throughput capital markets and video streaming platforms, optimizing database queries (reducing API latency by up to 60%), and implementing **Redis caching** for high-concurrency systems (~1.8M daily requests). Adept in Object-Oriented Design (OOP), Multithreading, System Architecture, and CI/CD automation.

SKILLS AND ACCOMPLISHMENTS

- **Core Java:** Java 11, Java 8, OOP, Multithreading, Collections Framework, Data Structures, Algorithms
- **Backend:** Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Hibernate, JAX-RS, REST APIs, Microservices Architecture
- **Caching & Messaging:** Redis, Distributed Caching, Apache Kafka (Concepts), RabbitMQ (Concepts)
- **Databases:** PostgreSQL, MySQL, MongoDB, Database Indexing, Query Optimization, Schema Design
- **Tools & Cloud:** AWS (EKS, EC2, S3), Docker, Jenkins (CI/CD), Git, Bitbucket, Jira, Agile, Scrum
- **Testing & Quality:** JUnit 5, Mockito, Test-Driven Development (TDD), Low-Level Design (LLD), Code Reviews

WORK EXPERIENCE

SOFTWARE DEVELOPMENT ENGINEER (SDE-2) | Moonstack Pvt. Ltd - Jaipur (Nov 2024 - Present)

Project 1 | Nuvama: Invest in Stock Market (FinTech / Capital Markets)

- Engineered scalable financial trading backend microservices using Java 11, Spring Boot, PostgreSQL, Redis, and AWS, sustaining 99.9% uptime.
- Developed and maintained 85+ RESTful APIs and 50+ database schemas, accelerating transaction throughput.
- Architected Margin Pledge microservice subsystem (Java JAX-RS, MongoDB, Redis), processing ~1.8 Million requests daily.
- Reduced API response latency by 60% by implementing an optimized Redis caching strategy and database query indexing.
- Resolved critical API concurrency bottlenecks affecting high-value transactions (INR 10L - 15Cr), enabling sub-second order processing.
- Containerized cloud-native microservices and supported deployments on AWS EKS via Jenkins CI/CD pipelines.

SOFTWARE DEVELOPER | Octal IT Solution - Jaipur (Dec 2023 - May 2024)

Project 2 | Circo: Short Video & Streaming Platform (Media)

- Developed backend Spring Boot REST APIs supporting real-time video upload and streaming workflows with 99.9% uptime.
- Integrated 5+ microservices with MySQL/PostgreSQL, optimizing query indexes to cut execution time from 3.0s to under 800ms.
- Containerized microservices using Docker and collaborated with DevOps to automate deployment, cutting release delivery time by 50%.

JAVA DEVELOPER | Microspark Software Solutions - Hyderabad (Nov 2021 - Nov 2023)

Project 3 | Unified Health Insurance Plan (Healthcare)

- Designed and built Java Spring Boot microservices for US state health insurance onboarding, boosting workflow efficiency by 40%.
- Integrated third-party identity verification REST services (IDNow), achieving 95%+ verification accuracy.
- Authored unit and integration test suites using JUnit and Mockito, reducing production defects by 25%.
- Conducted peer code reviews and participated in Agile/Scrum sprint ceremonies to maintain clean code quality.

EDUCATION

B.Sc. in Computer Science | Jaipur National University, Jaipur, Rajasthan (**Graduated: 2021**)
