PROFESSIONAL SUMMARY

Backend-focused Java Developer about 4 years of experience in building RESTful APIs and microservices using Spring Boot and core Java. Skilled in database integration, secure API development, and optimizing backend performance. Strong problem-solving ability with experience in debugging and production support. Actively seeking an SDE-1 role to contribute to stable, scalable backend systems.

SKILLS AND ACCOMPLISHMENTS

- **Core Java:** Strong grasp of object-oriented programming, data structures, and algorithms.
- **Backend:** Java, Spring Boot, JAX-RS, Spring Data JPA, Hibernate, Design patterns, Test Driven Development..
- **APIs & Services:** RESTful APIs, JWT Authentication.
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Tools:** Git, GitHub, Bitbucket, Docker (Basics), Jenkins (CI/CD pipeline), Jira, Agile, Scrum.
- **Testing:** JUnit, Mockito
- **Core Concepts:** OOP, Multithreading, Collections
- **Software Development Life Cycle (SDLC):** Exposure to the complete software development life cycle, from requirements gathering to deployment.

WORK EXPERIENCE

SOFTWARE DEVELOPMENT ENGINEER -1 | Moonstack Pvt. Ltd — Jaipur | Nov 2024 – Present

Project1 | Nuvama : Invest in Stock Market (Available in App Store, Playstore, TX3 desktop)
Engineered a scalable financial trading platform using Java, Spring Boot, PostgreSQL, Redis, and AWS. Developed and maintained 85+ APIs and integrated 50+ database objects, optimized performance by reducing API latency by 60% through Redis caching, and deployed cloud-native microservices on AWS EKS. Enabled real-time market data processing, third-party integrations, and automated operational monitoring for high-volume capital markets applications.

Responsibilities:

- Developed a Margin pledge system (Java JAX-RS, MongoDB) with Redis caching, handling ~18 Lacs requests daily..
- Enabled users to pledge, unpledge, and modify holdings, and added multi-DPID order placement, improving transaction flexibility.
- Resolved a critical API issue affecting pledge requests (₹10 L–₹15 Cr), enabling instant transaction processing.

SOFTWARE DEVELOPER | Octal IT Solution — Jaipur | Dec 2023 – May 2024

Project2 | Circo Short Video & Streaming App

Developed Backend RESTful APIs using Spring Boot. Improved platform scalability, reducing system downtime by 25%. Optimized databases interactions with MySQL, increasing query

Performance by 30%. Consolidated user retention by 20% through real-time streaming and video upload features, and ensured 99.9% uptime with Docker and AWS deployment.

Responsibilities:

- Built Spring Boot APIs, reducing downtime by 25% and boosting performance 30%, resulting in 98% user satisfaction..
- Integrated 5+ microservices with MySQL/PostgreSQL, optimized queries and schemas, cutting average execution time from 3 s to <1 s.
- Utilized Docker for containerization of microservices, enhancing alignment with project goals and timely delivery of features.
- Collaborated with the DevOps team to automate deployment processes, reducing deployment times by 50%.

JAVA DEVELOPER | Microspark Software Solutions — Hyderabad | Nov 2021 – Nov 2023

Project3 | Unified Health Insurance Plan

Designed and implemented a Java-based Insurance Onboarding System for New Jersey state citizens using Spring Boot. Streamlined customer onboarding, reducing time by 30% and advancing efficiency by 40%. Achieved 95% accuracy in identity verification through IDNow integration, reducing errors by 25% and enhancing user trust and reliability.

Responsibilities:

- Led requirements gathering, analysis, design, and development, producing comprehensive documentation that improved team collaboration and reduced miscommunication by 40%.
- Developed efficient and scalable Java code with Spring Boot, boosting application performance by 20%.
- Implemented RESTful APIs for third-party service integration, enhancing data accessibility.
- Conducted code reviews, resolving 90% of issues and improving overall application performance.
